### STEP 2.2

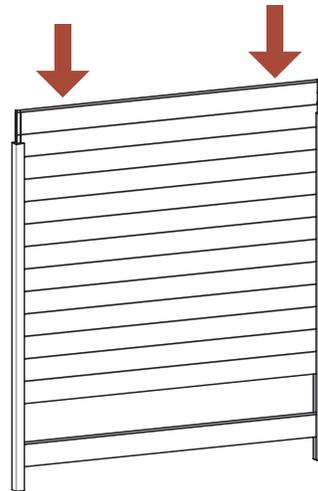

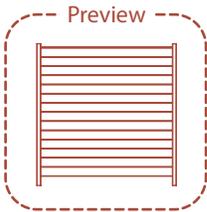

1. Insert a Privacy Board (F) into the grooves of the left and right post.

2. Drive (4) 1" Stainless Steel Screws (G) into the pre-drilled holes in the posts to secure the privacy boards and post anchors.

## STEP 4: ASSEMBLE THE SECOND SCREEN

### STEP 4.1

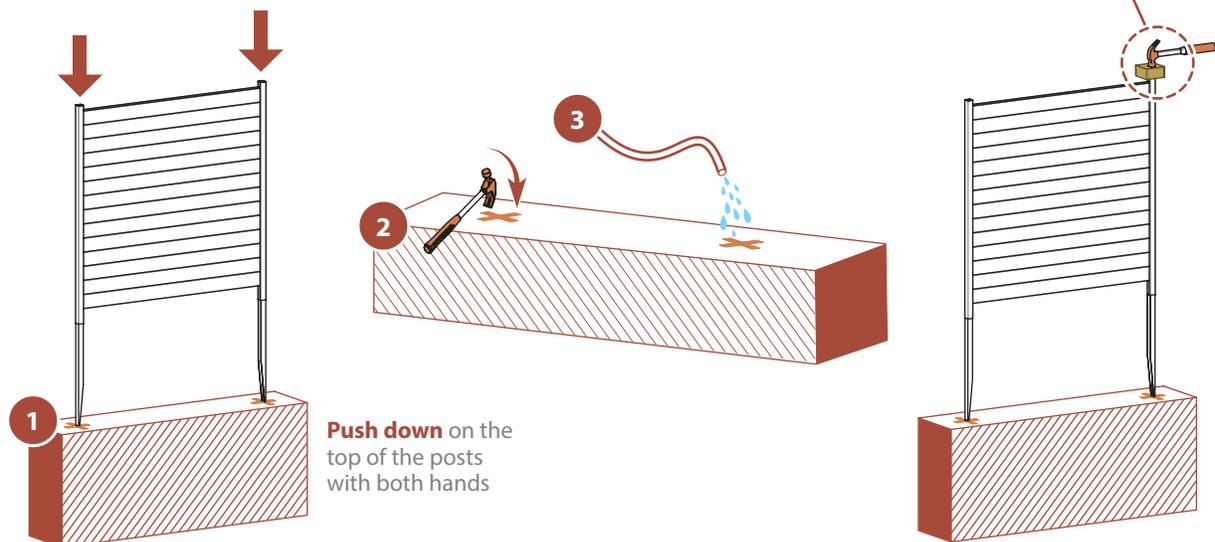

Repeat Steps 2-3 in order to assemble the second screen.

## STEP 5: INSTALLING THE SCREEN IN THE GROUND

### STEP 5.1

1. Move the screen to its final location and identify where the posts are located. Attempt to push the unit into the ground as illustrated.
2. If your ground is too hard, loosen the top 6" or 7" of the ground with a claw hammer as illustrated.
3. Add water to loosened soil.
4. Use a block of wood to protect the top of the post and gently hammer the post into the ground.

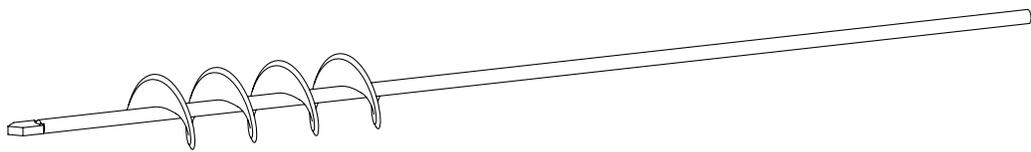

## STEP 5.2

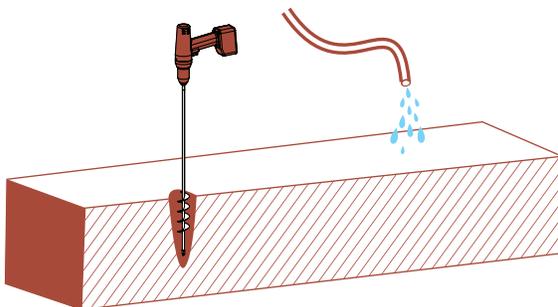

► **Optional in hard ground:** If your ground is too hard, or you have more than 3 or 4 panels to install, please consider these options:

1. Use a 1¼" diameter auger bit (commonly used for planting tulips) as illustrated (\$15-\$20 on Amazon.com).
2. Drill a hole about 12" to 16" deep at the desired location, and fill the holes with water as illustrated.
3. Push the panel posts into the holes.

**STEP 5.3**

If your ground is really hard, you may need to dig a hole 8" in diameter and 14" deep to accommodate one post from each panel into the same hole.

**STEP 5.4**

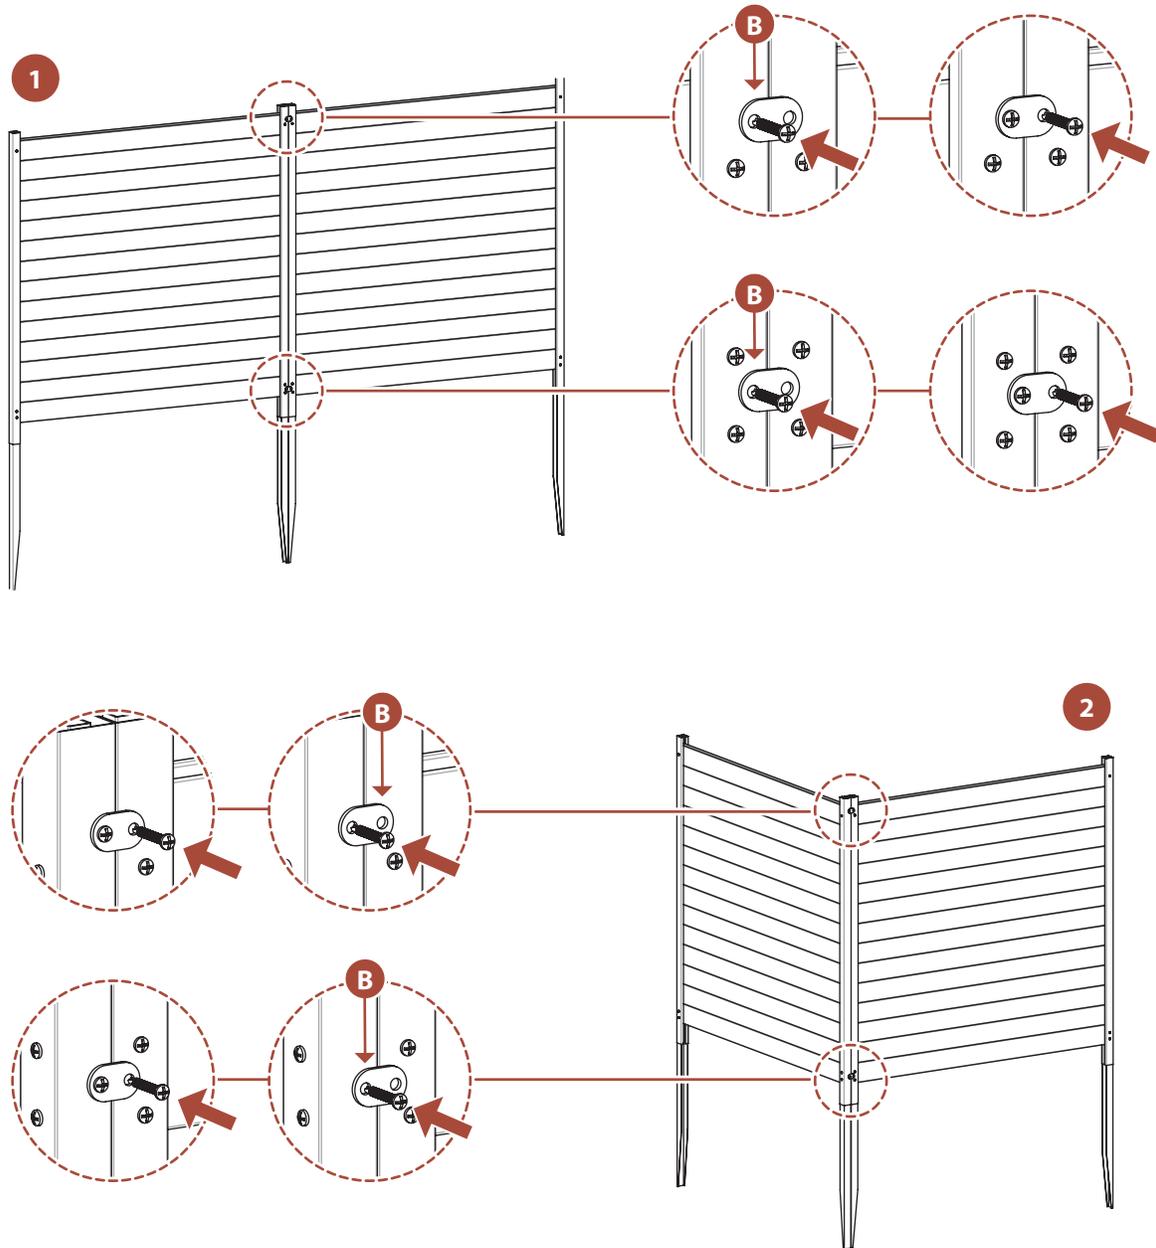

Level the screen as necessary, backfill excavated dirt, and tamp if needed.

## STEP 6: CONNECT THE SCREENS
